

DOES YOUR HOME HAVE A HOLE THE SIZE OF A LARGE DOG?

Did you know that a typical home has more than a half mile of gaps and cracks throughout the structure? According to Natural Resources Canada (NRCAN), that's equivalent to a hole the size of a **large dog!**

\$5,000

ECOENERGY GRANTS
ARE BACK!

SAVE MONEY

by upgrading the performance of your home with proper insulation, air sealing, and draft proofing in these **4 key areas:**

Attic

An attic upgrade including air sealing can result in energy savings of **35-50%**.

Walls

Insulating wall cavities can result in energy savings of **25-30%**.

Air Sealing

Air leakage control is the single most important retrofit activity and should be considered first in any retrofit strategy.

Basement Renovation

The strategic use of foam will result in the most clean, comfortable, and energy efficient living space possible.
