## Excess Gas Service Length Acknowledgement Letter

Effective date of Jan 1, 2012

Union Gas will install a residential natural gas service up to 30 metres in length at no charge to the homeowner. This distance is measured from the gas meter to the property line, following the path the pipe takes through the ground and around any obstacles such as trees, septic beds, wells and other utilities. Union Gas will decide where the meter and service are installed and may not be able to take the shortest path. If the service is longer than 30 metres, excess length will be charged at a rate of \$45 + HST per metre of installed pipe. These charges will be applied to homeowner or occupant's Union Gas bill.

Union Gas requires this Excess Footage Acknowledgement letter be signed and submitted before your service request will be processed. Charges will be applied automatically to your Union Gas bill after installation of the service.

Union Gas will contact the applicant if any of the 3 points below apply to your request, as additional charges will be applied. Another signed agreement will be required, prior to construction.

- Extreme construction conditions are identified (for example; full bedrock for the length of the service)
- A customer requests pressure gas (that is above the standard 7" w.c. or 1.75kPa delivery pressure), and
- A new service is requested for a lot previously serviced by Union Gas

By virtue of signing this form, I hereby authorize Union Gas to apply on my behalf for all permits needed to construct any natural gas facilities, including, but not limited to permits required by any Conservation Authority. I understand that site inspections by Union Gas or any permit-granting authority may be required.

### Acknowledged and Accepted
